Coal-Tar and Water-Gas Tar Creosotes

By Ernest Bateman

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1922 Excerpt: . temperature. 1. A high-boiling creosote. 2. A carbolineum. in dynes per square centimeter, Tthe absolute temperature in degrees centigrade and K and A constants for the oil. When the viscosity is determined at the two temperatures, Tx and T2, then Vi r/ tog Ft-log P.-A y2-3ii0rlog T2-log 21 substitute the value of A in the first equation and solve for K. The equation thus obtained will give the values of V at any temperature, providing the original determinations were accurate. The equations G.54(10)18 for the two curves shown in figure 28 are F=----TM fr the creo 5 31 (10)30 sote and V= j, ne3--for the carbolineum. The viscosity of oil is supposed to have an effect on its penetrance into wood, and it seems reasonable to suppose that a limpid fluid. would be easier to inject than a more viscous one. Weiss (16) stated that...

Reviews

The publication is easy in read through safer to comprehend. It is actually loaded with wisdom and knowledge Its been printed in an extremely simple way and is particularly simply right after i finished reading through this pdf where actually modified me, affect the way i believe.

-- ***Ms. Clementina Cole V***

This is the very best publication i have got read until now. It is definitely simplified but shocks within the fifty percent of the pdf. You may like how the article writer create this pdf.
