

Report of the Board of Engineers on Deep Waterways Between the Great Lakes and the Atlantic Tide Waters Volume 2; Dec. 7, 1900.--Referred to the Committee on Rivers and Harbors and Ordered to

Filesize: 4.91 MB

Reviews

Most of these ebook is the perfect publication offered. Sure, it really is play, still an interesting and amazing literature. You wont truly feel monotony at whenever you want of your time (that's what catalogs are for about in the event you check with me).

(Roosevelt Rohan)

Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1900 Excerpt: .for the maximum months (as, for instance, September and October, 1805) to and above the 1,100 cubic feet per second which the main section of the feeder between Sandy Creek and Kasoag ponds is nominally designed to carry. At this point of the argument the question may be further raised, is the water supply as here designed absolutely beyond question so long as it appears necessary to provide for the contingency of any interruption to north of Salmon River? To this proper question the answer is, that the length of artificial channel from Salmon River (station 2658+50) to Upper Kasoag pond (station 2840) is only 3.44 miles. This section of the canal is laid through swamp, where there is no conceivable possibility of interruption from breaks or the ordinary accidents of operation of such a channel. There are no high dams to give way, and the Salmon River dam (No. 47) is founded on rock and designed with such liberal factor of safety as to be beyond the possibility of any accident except an earthquake, proper construction being assumed. From Kasoag ponds to where the feeder leaves West Branch of Fish Creek (station 4207+70), for a distance of 27.61 miles, the feeder water flows through the valley of West Branch, where it is entirely beyond the mutations of accident. From station 4207+70 to Dam No. 63 (station 4560+80) the construction must necessarily be of the most permanent character. As already stated, there is no reason why,...
