Saliva As A Diagnostic Tool

By Tharun Varghese Jacob

LAP Lambert Academic Publishing Nov 2013, 2013.

Taschenbuch. Book Condition: Neu. 220x150x5 mm. Neuware - 'Even though the saliva lacks the drama of blood, sincerity of sweat, emotions of tears saliva should be used as biomarker to detect pregnancy, diabetes mellitus, oral pre cancer & cancer, infectious diseases and also to catch the suspect by eliciting DNA from saliva over the bite marks in forensic odontology. This may allow a diagnosis of cancer to be made at an earlier stage, giving patients more choice in various treatment options. Doctors hope that, advancements in salivary diagnostics in the future will replace invasive biopsies and provide new avenues in early detection and diagnosis. It is a perfect medium for surveillance of health and disease. Saliva is ideal for screening premalignant and malignant oral neoplasms because of its anatomical proximity. Saliva contains specific biomarkers associated with either a healthy or diseased state'. 88 pp. Englisch.

Reviews

An incredibly amazing ebook with perfect and lucid answers. It is written in basic terms and never difficult to understand. It's been written in an exceptionally basic way and it is only right after I finished reading this ebook in which it in fact modified me, affected the way I really believe.
