Reviews

This type of publication is every thing and helped me seeking ahead and much more. It usually fails to charge too much. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Juliet Mertz)

KI 2002: ADVANCES IN ARTIFICIAL INTELLIGENCE: 25TH ANNUAL GERMAN CONFERENCE ON AI, KI 2002, AACHEN, GERMANY, SEPTEMBER 16-20, 2002. PROCEEDINGS

Springer. Paperback. Book Condition: New. Paperback. 334 pages. Dimensions: 9.2in. x 6.1in. x 0.7in. This year marks the 25th anniversary of the Annual German Conference on Artificial Intelligence. When starting in 1975 as the German Workshop on AI (GWAI) in Bonn, the meetings were primarily intended as a forum for the German AI community and thus, over the years, also reflected the development of AI research in Germany. Right from the beginning, the goal of the meetings has been to bring together AI researchers working in academia and industry to share their research results and interests in the field of artificial intelligence. In 1993, the name of the meeting changed to its current form Annual German Conference on Artificial Intelligence, or KI for short. Since KI-94 in Saarbrücken presentations have been in English and the proceedings have been published in the Springer LNAI Series. With that the meeting has become a truly international event, and still is in 2002. This volume contains the proceedings of the 25th Annual German Conference on Artificial Intelligence. For the technical program we had 58 submissions from 17 countries and from all continents except Australia. Out of these contributions slightly less than 30 (20 papers in total) were selected for presentation at the conference and for inclusion in the proceedings. The contributions in this volume reflect the richness and diversity of artificial intelligence research. They cover important areas such as multi-agent systems, machine learning, natural language processing, constraint reasoning, knowledge representation, planning, and temporal reasoning. The paper On the problem of computing small representations of least common subsumers by Franz Baader and Anni-Yasmin Turhan (Dresden University of Technology) stood out for its exceptional quality and the program committee selected it for the Springer Best Paper Award. Congratulations to the authors for their excellent contribution. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
