Art and Architecture explores some of the scientific principles in sculpture, painting, photography, and the design and construction of buildings. Learn about how light creates the colors you see in a painting and how holograms are produced. Discover the history of architecture from the ancient stone pyramids of Egypt to modern structures made from glass and steel. Hands-on activities help bring the science of art and architecture to life with topics ranging from how the forces of tension and compression affect the design of a bridge to how perspective in a drawing can make a picture look more lifelike.; - Tall buildings dominate the landscape of most major cities, and crowds stare in awe of masterpieces in museums around the world.
