"In the present era of large scale rural out migration it has become essential to scientifically explore its various dimensions so that necessary preventive measures may be undertaken. The book presents a comprehensive theoretical framework of the problem, assesses its extent, enquires into its causes and unravels its consequences. It is widely known today that a wide variety of 'push' and 'pull' factors contribute to outmigration of the physically fit and mentally alert rural population to urban industrial centres, creating overcrowding in cities and deterioration in the quality of urban services and giving rise to the emergence of slums and generating a multiplicity of serious adjustmental problems before the outmigrants. Without scientific study of rural outmigration, neither it is possible to promote development of rural areas nor is it possible to ensure desired quality of life to the residents of urban areas. The book makes a commendable effort in this regard." (jacket) 313 pp.
