real-time signal processing algorithms on DSP

By BEN SHE.YI MING

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment.Publisher: Electronics Industry Pub. Date :2008-02-01. Real-time signal processing is a high-performance digital signal processing device (DSP) applications in the important challenges faced by its successful application requires not only a thorough understanding of digital signal processing theory. but also complete control of real-time DSP system design and application technology. Book easy to understand introduction to the principles of DSP chips in the communications and signal processing applications. detailed description of the real-time DSP signal processing algorithms implementation. The book first introduces the DSP chip s basic structure and characteristics. including internal structure. assembly instructions and integrated development platform (CCS); then. throughout the entire design process. detailed discussion of the DSP chip system design methods; Finally. the combination of communication and the practical application of signal processing. signal waveform generation. FIR and IIR filtering. orthogonal transformation (FFT. DCT. DHT. Hilbert transform and wavelet transform). voice and image coding. modulationFour Satisfaction guaranteed,or money back.

Reviews

An incredibly wonderful book with perfect and lucid explanations. It normally is not going to price a lot of. I am just very happy to tell you that this is the greatest pdf we have go through within my personal lifestyle and could be he finest book for at any time.
-- *Bart Lowe*

This is basically the greatest pdf i actually have go through till now. It is definitely simplistic but surprises within the fifty percent in the ebook. I am easily will get a delight of studying a published ebook.
